TABLE I.

AREA, HOUSES, AND POPULATION.

This table shows for each district the area, the number of towns and villages, the number of occupied houses, and the total urban and rural population, male and female. The districts are arranged in this and other tables in the order prescribed by Government.

Similar figures are given for the Feudatory States attached to the Lieutenant-Governorship of Bengal. Detailed figures for each of the Tributary States of Orissa and Chota Nagpur will be found on page 4.

The difference between some of the areas here shown and those in the corresponding table of 1891 is due to inter-district transfers, as explained on the title-page of table II, except in the case of Chittagong, for which district revised figures have been supplied by the Survey Department, and of a few districts where the figures in the last Census Report were found to differ slightly from those generally accepted as correct.

For the purpose of column 3 (Number of towns), cantonments have been treated as forming part of the municipalities which they adjoin; for instance, Fortwilliam and Calcutta are taken as forming one town.

TABLE II.

VARIATION IN POPULATION SINCE 1872.

This table compares the population as now ascertained with that of the three previous Censuses. The figures for the latter differ slightly from those shown in the old Census Reports. This is due to subsequent changes of jurisdiction, i.e., transfers of area from one district to another. The effect of these changes on the population of the districts concerned has been calculated, and the figures have been adjusted accordingly.

The following are the districts which have undergone changes of jurisdiction:—

Between 1872 and 1881-

Burdwan, Bankura, Birbhum, Midnapore, Hooghly, 24-Parganas, Jessore, Murshidabad, Rangpur, Faridpur, Backergunge, Mymensingh, Noakhali, Tippera, Gaya, Monghyr, Bhagalpur, Singhbhum, Manbhum.

Between 1881 and 1891-

Burdwan, Birbhum, Midnapore, Hooghly, Nadia, Rajshahi, Bogra, Darjeeling, Jalpaiguri, Dacca, Faridpur, Mymensingh, Tippera, Patna, Shahabad, Saran, Darbhanga, Bhagalpur, Monghyr, Purnea, Malda, Sonthal Parganas, Cuttack, Puri.

Between 1891 and 1901-

Hooghly, Howrah, Dinajpur, Bogra, Rajshahi, Pabna, Jalpaiguri, Dacca, Faridpur, Patna, Shahabad, Saran, Muzaffarpur.

The total population of the Province received an addition of 105 persons, transferred from Ganjam to Puri, between 1881 and 1891, and another of 590 persons, transferred from Ghazipur to Shahabad, between 1891 and 1901. On the other hand, during the latter decade it lost 616 persons transferred from Jalpaiguri to Goalpara.

Details of the changes in the population of each of the States of Orissa and Chota Nagpur will be found on the last page of the Table.

TABLE III.

TOWNS AND VILLAGES CLASSIFIED BY POPULATION.

In this table, as in Tables I and IV, Cantonments have been treated as forming part of the municipalities which they adjoin.

In a few districts that have been cadastrally surveyed, the mauza or survey village has been taken as the village. Elsewhere it is the residential village or group of houses bearing a separate name; small outlying hamlets have been treated as part of the main residential village to which they appertain.

TABLE III.—Towns and VILLAGES.

TABLE IV.

POPULATION OF TOWNS WITH VARIATION SINCE 1872.

This table shows the population of all municipalities and cantonments and also of certain other places (chiefly subdivisional head-quarters) which are of an urban character though not under municipal government.

For the purpose of comparison with previous censuses when the cantonment population was not separately recorded, the population of cantonments has been added to that of the municipalities which they adjoin. The population of these cantonments is shown below:—

CANTONMENT.	Municipality with which included.	Total population.	Males.	Female
1	2	3	4	٥
Fort William	Calcutta	4,012	3,900	71:
Dum-Dum	North Dum-Dum	4,920	3,471	1,445
Barrackpore	South Barrackpore	9,888	6,042	3,846
Jalapahar and Lebong	Darjeeling	1,231	778	453
Dinapore	Dinapore	10,841	5,039	4,902
Cuttack	Cuttack	4,810	2,511	2,295
Doranda	Ranchi	2,844	1,606	1,178

The population of Calcutta and the suburban municipalities as returned at previous enumerations has been adjusted on account of subsequent changes in municipal boundaries. The figures now given represent the population of the area now included in each municipality. Similarly, the figures for Howrah in 1872 and 1881 represent the population of the present area of that municipality, excluding Bally, which was cut off and formed into a separate municipality in 1883. There have been thanges in other municipal areas also, notably in that of Kushtea, but it is impossible now to make the necessary adjustments, and the old figures have therefore been left unaltered.

It has been found impossible to ascertain the former population of places now treated as towns for the first time.

TABLE VII.

AGE, SEX, AND CIVIL CONDITION.

This table is divided into three Parts. Part A (pages 29-32) shows the distribution, for the Province as a whole, of the total population and of each religion by age, sex, and civil condition. Part B (pages 33-52) shows the distribution, for District and States, of the total population and of the main religions by age, sex, and civil condition; but in this Part, in order to economise space, the age statistics have been given in less detail than in the provincial summary. Part C (pages 53-58) gives similar details for Cities.

TABLE VIII.

EDUCATION.

This table, like Table VII, is divided into three parts. Part A shows the extent of literacy in the Province as a whole amongst the total population and for each religion returned; Part B gives details for districts for the total district population and for each main religion; and Part C gives similar details for cities.

The table shows the number of persons literate in each of the main provincial vernaculars. The number of persons literate in English has also been shown. Some of these have returned English as their only language, while others are also literate in a provincial vernacular, and have accordingly been entered twice—once in the column referring to the vernacular in question, and again in the column "Literate in English." The latter column must therefore be left out of account in calculating the total number of literate persons. In order that the details of the other columns may work up to the "Total literate," persons literate in English only have been shown in the column "Other languages" as well as in the column "Literate in English." The number of these persons is noted in the remarks column.

PART C.—DETAILS FOR CITIES—concluded.

TABLE IX.

ED UCATION

BY SELECTED CASTES, TRIBES, OR RACES.

This Table repeats the information given in Table VIII in respect of education, with this difference that, whereas in that Table the population is distributed by age and religion, it is here arranged according to caste or tribe. Moreover, in Table VIII the whole population is dealt with, but this Table refers only to selected castes and tribes; the minor castes and tribes have been left out of account altogether, and even those selected for inclusion have been taken only for the districts where they were specially numerous. To save space, figures have been given, not for each district separately, but for groups of districts, the local conditions of which may be presumed to be fairly uniform.

It may be explained that the total district strength of a caste in this Table does not necessarily tally with that in Table XIII, as the latter includes figures added in the course of classification, which the present Table does not. For example, Lámá is a title of Murmi, and persons so returned would be added to Murmi in Table XIII, while in Table IX they would be left out of account.

15 males and 1 female literate in Khas. also literate in Khas and all the others are literate in Tibetan, ad 4 females literate in Khas.

TABLE X.

LANGUAGE.

This table is defective in that it fails to separate the various dialects of Bihári from Hindi. The great majority of persons speaking Bihári dialects returned their language as Hindi, and only a few named the actual dialect spoken by them. For the purpose of this table, therefore, the only possible course was to class all alike as Hindi. The figures returned for individual dialects are given at the end of the table (page 138). An estimate of the actual number of persons speaking each dialect, based on the results of the Linguistic Survey, will be found in the body of the report.

Bengali, like Bihári, possesses several distinct dialects, and some of these have been more fully returned, viz., Chákmá, Mál Paháriá, and Hájong. Others, however, such as Rangpuri, Chatgáiyá, and Kisánganjia, have not been returned at all, and it has therefore been thought best to include all dialects under the main head "Bengali" in the body of the table. The number of persons returned as speaking each dialect will be found on page 138. The dialects included in Márwári, Gujaráti, Gipsy dialects, Bhumij, and Gáro are shown on the same page.

TABLE XI.

BIRTHPLACE.

This table is divided into two parts—Part A contains the statistics of birthplace for the Province as a whole and for each district and State comprised in it. Part B contains similar information for certain towns treated at the Census as cities.

Of the persons shown in Part A as born in Arabia, 13 (10 males, 3 females) were born at Aden. The figures for China include Hongkong (112 males and 6 females) and Shanghai (11 males). Those for "Turkey in Asia" include Armenia (11 males, 2 females), Asia Minor (4 males, 6 females), Bagdad (3 males, 2 females), and Palestine (1 male, 1 female). Of the persons born in "Mauritius and St. Helena," 8 males and 7 females were born in Mauritius and the rest in St. Helena. Under "Russia" are included 10 males and 1 female born in Finland; and under "Canada" 1 male and 1 female born in Nova Scotia and 2 females born in Newfoundland. One male was born in Cyprus; all the other entries against "Malta and Cyprus" refer to Malta. Of the persons entered against "Denmark and Iceland," all but three males were born in Denmark.

The birthplace statistics for Calcutta are given in Part A, and are therefore not repeated in Part B, but they are included in the figures showing the total for all cities (columns 2, 3 and 4 of Part B).

TABLE XII.

INFIRMITIES.

THE infirmities recorded at the consus were insanity, deaf-mutism, blindness and leprosy.

The table is divided into two parts—Part A shows the distribution of the persons afflicted according to locality, and Part B their distribution according to age.

Some unfortunate persons were returned as suffering from more than one infirmity. In the table they have been shown under each. This explains why the "Total afflicted" in columns 2, 3 and 4 does not quite agree with the total of the figures for each separate infirmity. The following is a list of these double entries:—

			Total.	Malos.	Females.
Insane and blind	•••		61	39	22
Insane and lepers	•••	•••	11	8	3
Insane and deaf-mutes	•••	•••	666	408	258
Deaf-mutes and blind			120	75	45
Desf-mutes and lepers	•••	•••	38	24	14
Blind and lepers	•••	•••	104	76	28
-					
	Total	•••	1,000	630	370

TABLE XIII.

CASTE.

This table is divided into two parts. Part A deals with the Castes and Tribes of Hindus, Animists, Buddhists and Jains, and Part B with those of Muhammadans. The figures for Christians are omitted from this table, as they are specially dealt with in Tables XVII and XVIII.

As a rule persons converted from Hinduism or Muhammadanism to Christianity were returned as "Native Christian," and their caste of origin was not mentioned in the Census Schedules. In the case of converts belonging to aboriginal tribes, however, the name of the tribe was frequently given, chiefly in Chota Nagpur and Darjeeling, and the number so returned has been noted for each tribe in the remarks column of the table.

Where some members of a caste or tribe profess one religion and some another, separate figures have usually been given for each; but if the second religion was returned only in one or two districts, the figures for it have been added to those for the main religion, and the number so added has been noted in the column of remarks.

It is often very difficult to decide whether a group (e.g., Kaora, Dhanua, Muchi, Pundari, Bholla) constitutes a separate caste or is a sub-caste of some other caste. The procedure that has been followed in each case is explained in the remarks column.

As far as possible, items that are not true castes have been eliminated from the return and added to the castes to which they appeared to belong after such enquiries, local and otherwise, as it was possible to make within the limited time available. The more important of these items are mentioned in the remarks column. A few, such as Rájbansi, Behárá and Banaudhia, were so numerous, or their proper affiliation was so uncertain, that it was thought better to leave them unclassified, and these have accordingly been entered as returned.

TABLE XV.

OCCUPATION.

For the purpose of this table, a classified scheme of occupations has been prescribed by the Census Commissioner. All occupations are divided into eight main classes; these classes are subdivided into twenty-four orders and seventy-nine sub-orders, and the sub-orders are further subdivided into 520 groups. Part A of the table shows the total strength of each group for (i) the whole Province, including cities, but excluding Feudatory States, (ii) the Feudatory States, and (iii) Cities. Part B gives similar information for each district, but in this part the sub-order is the unit, and only those groups in each sub-order are shown separately the strength of which in any district reaches 1,000. In Part C the occupations are distributed according to religion, and in Part D are shown subsidiary occupations returned by persons whose main occupation is agriculture. The subsidiary occupations in Part D are given without any reference to the classified scheme of occupations, and each term used has been interpreted in the widest possible sense: for example, pedlars and sollers of all articles, except milk and grain, have been shown against 'Shop-keepers;' palki-bearers, thatchers, earth-workers, firewood gatherers and railway coolies against 'General Labourers,' and muharrirs, pleaders' clerks, money-lenders' gomashtás, 'Service, Indigo Factory,' 'Service, Jute Mills,' zamindars' naibs, etc., egainst 'Clerks, not Government.'

#### TABLE XVI.

#### OCCUPATION BY CASTE.

The table is divided into two parts. Part B deals with Muhammadan castes, &c., and Part A with all others. The occupations generally are arranged by "Orders" (see Title-page to Table XV), but the number of persons in the "Groups" forming the actual traditional occupation of each caste is given in the notes at the foot of the table.

In the Appendix to this table the distribution by caste of Hindus, Buddhists and Animists shown as actual workers has been given in respect of a few of the most important Groups of the Classified Scheme of occupations.

#### TABLE XVII.

#### CHRISTIANS BY SECT AND RACE.

This table shows the sects of Christians of all races. Persons who returned themselves as Protestants without specifying any particular sect and whose sect could not be subsequently ascertained have been treated as belonging to the Anglican communion. The total number of such persons is 1,212, viz., 281 Europeans, 202 Eurasians, and 729 Natives. Armenians have been classed under the head "European and allied races." They are shown separately in Table XVIII. The Feringis of Eastern Bengal have been treated as Eurasians for the purpose of this table. Their number and the sects to which they belong are as follows:—

		Sect.		Total.	Male,	Femal
		1		 2	3	<u> </u>
Anglican	comm	union	 	 ,	1	<u> </u>
Baptist			 	 185	92	93
Roman				 2,027	1,011	1,016

#### TABLE XVIII.

#### CHRISTIANS BY RACE AND AGE.

This table is in two parts. Part A shows the distribution by districts and in the Province as a whole. Part B contains details for all places treated as cities. The Feringis (males 1,112, females 1,109) have been excluded in this table from the figures for Eurasians.
